

IQL · all seven datasets · standard BCA without IW

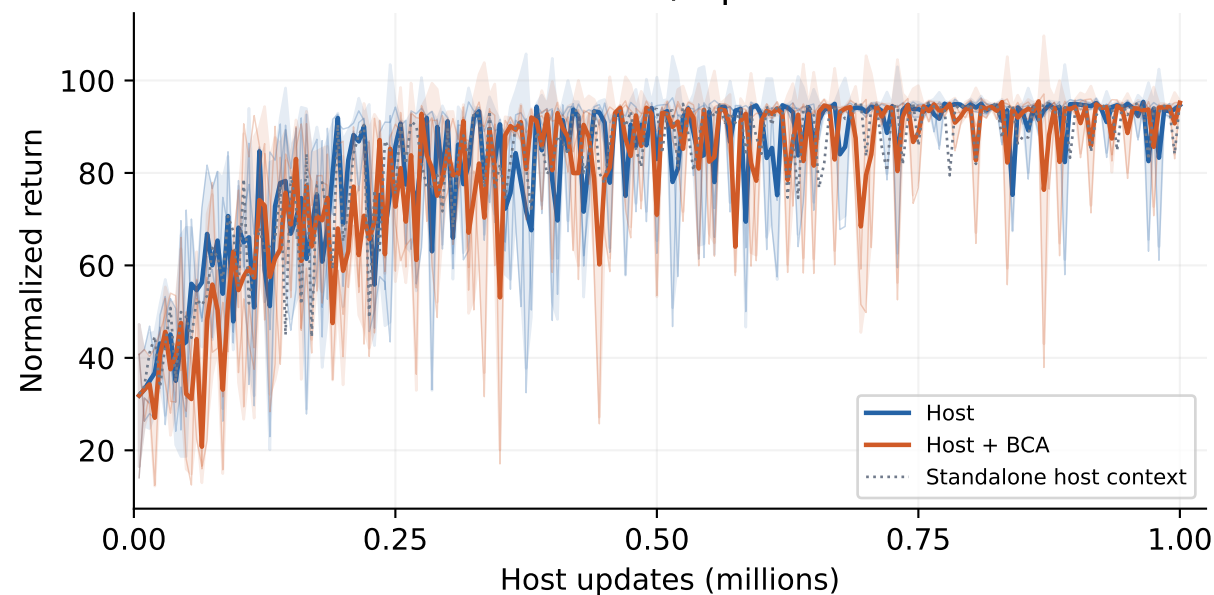

Hopper · 3/5 paired seeds

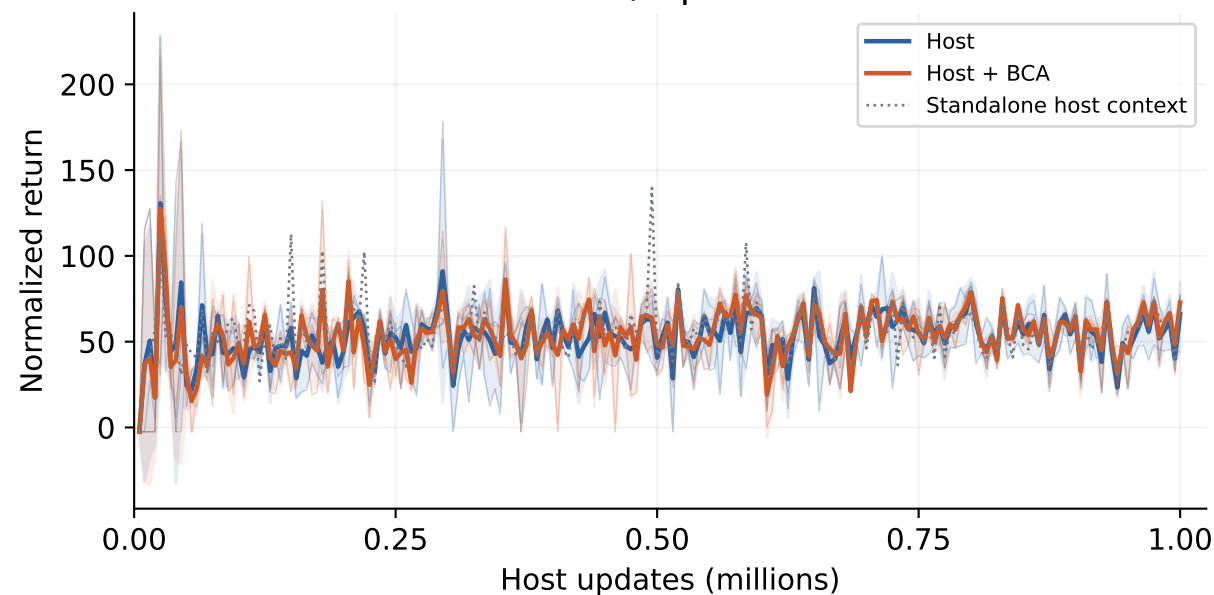

Walker · 3/5 paired seeds

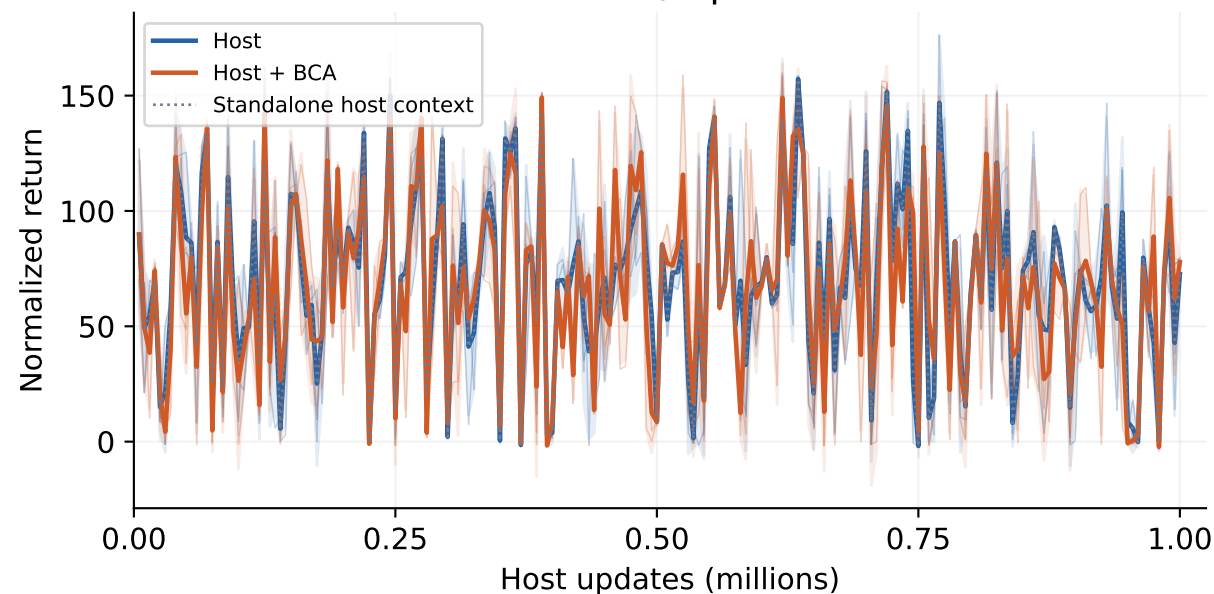

HalfCheetah · 3/5 paired seeds

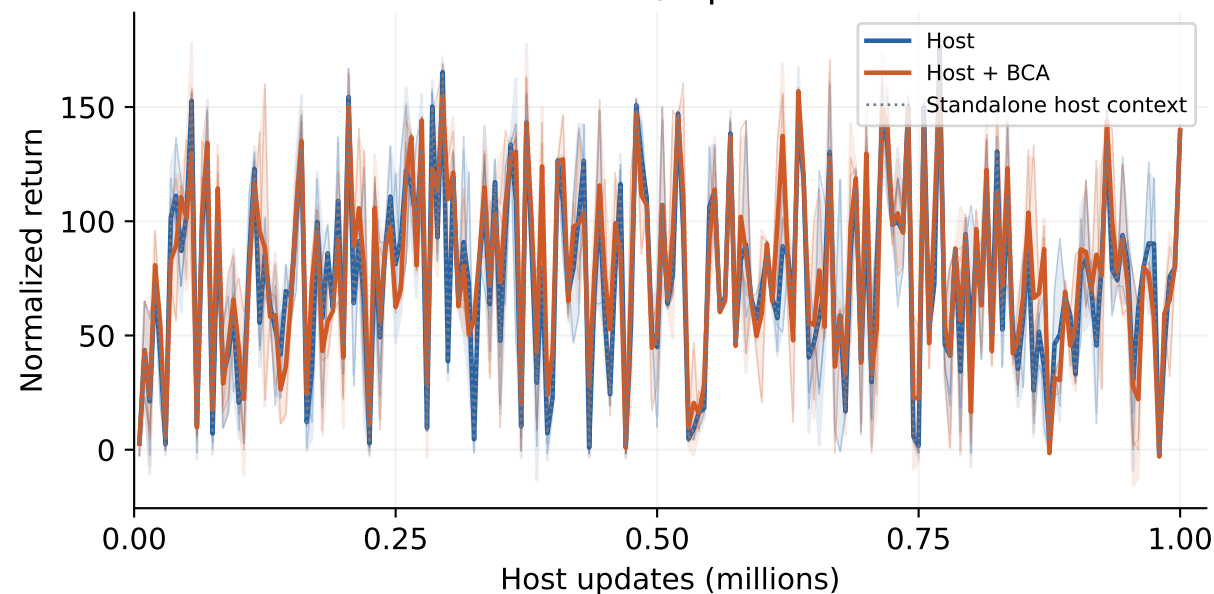

Maze2D · 3/5 paired seeds

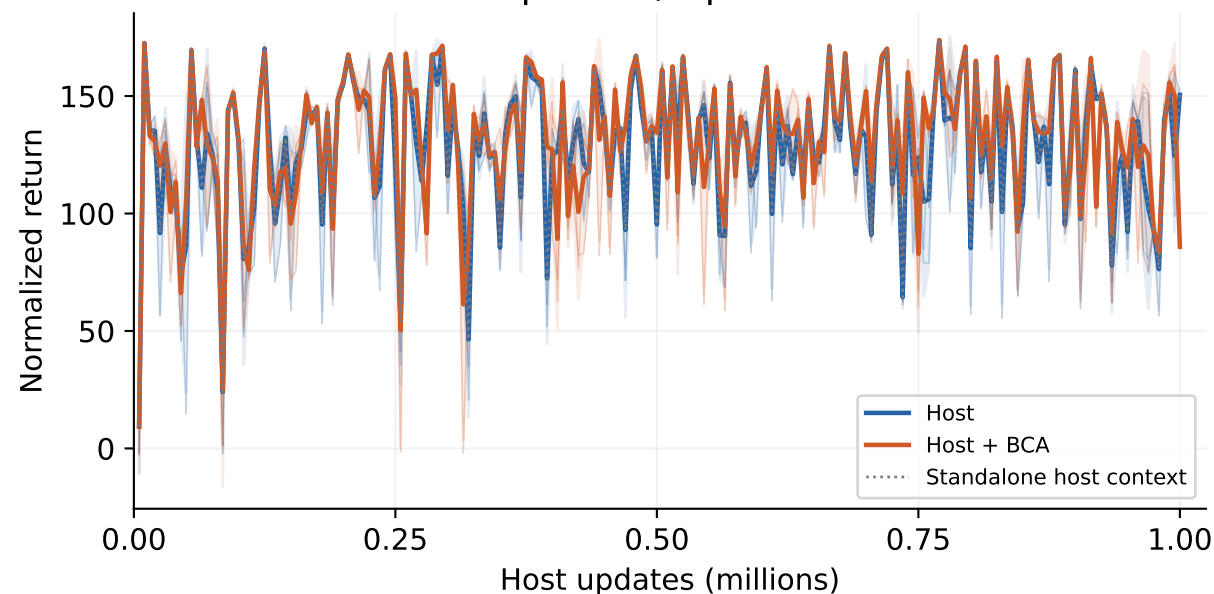

Pen human · 3/5 paired seeds

Pen cloned · 3/5 paired seeds

Pen expert · 3/5 paired seeds

Matched training seeds only

Thin lines: individual seeds

Thick lines: seed mean

Shade: ± 1 sample SD across seeds

SD is descriptive, not a confidence interval.

Pending cells remain visible.

Independent review status is in the table.

Primary pair shares nuisance Q/V.

Gray standalone host is context only.

IQL periodic banks have 2 episodes.
