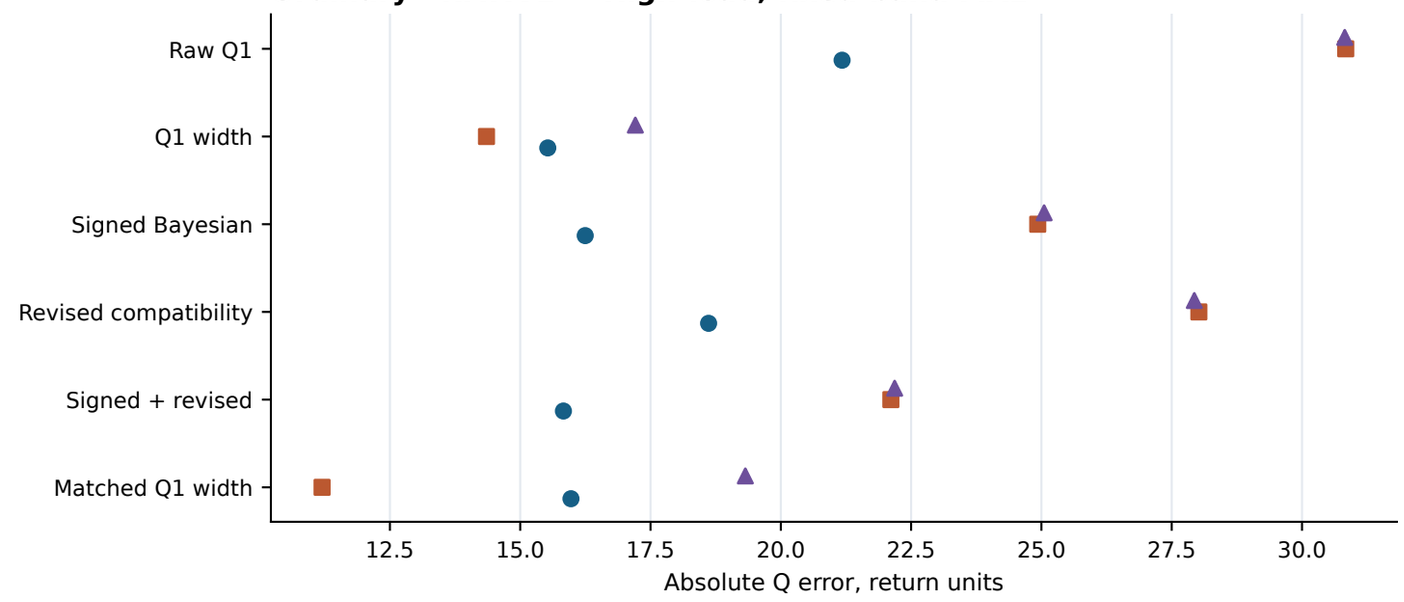
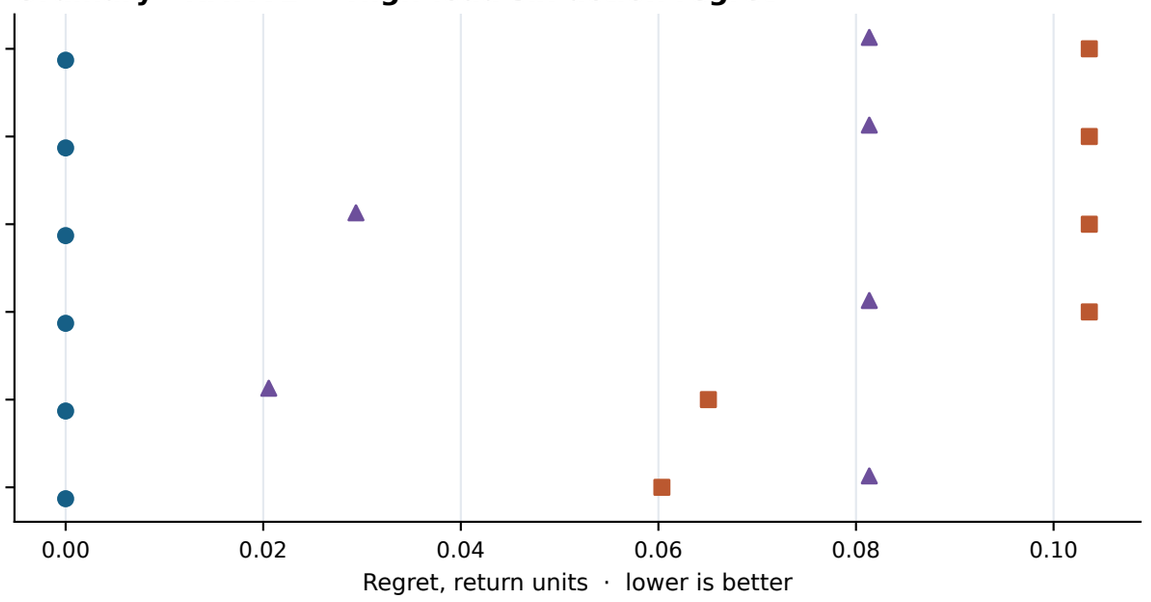
Frozen action scores: accuracy and decision regret

Seed 0 · Seed 1 · Seed 2

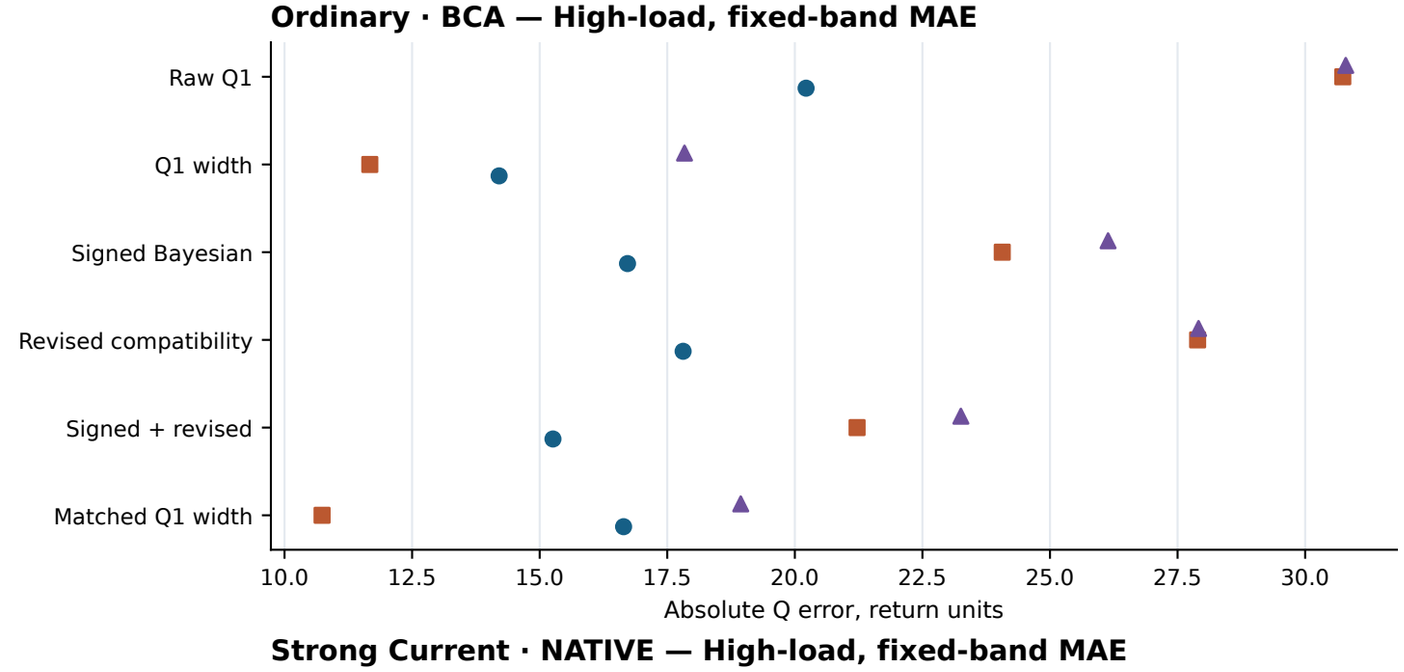
Ordinary · NATIVE — High-load, fixed-band MAE



Ordinary · NATIVE — High-load six-action regret

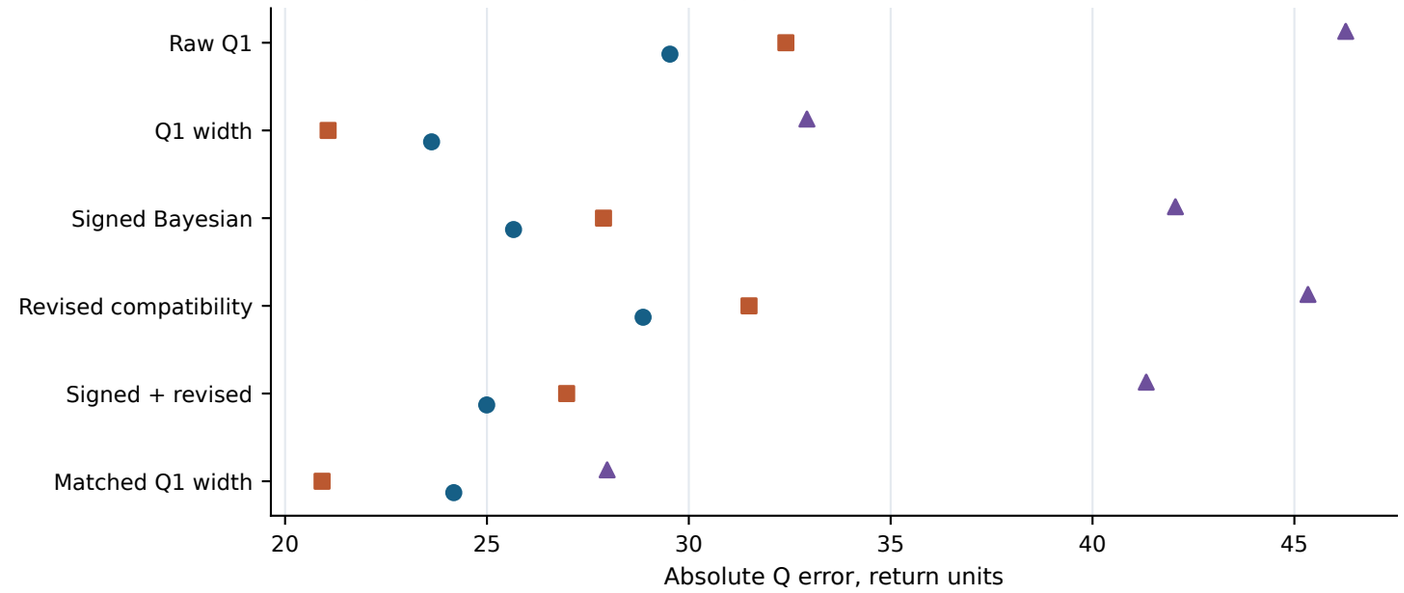


Ordinary · BCA — High-load, fixed-band MAE

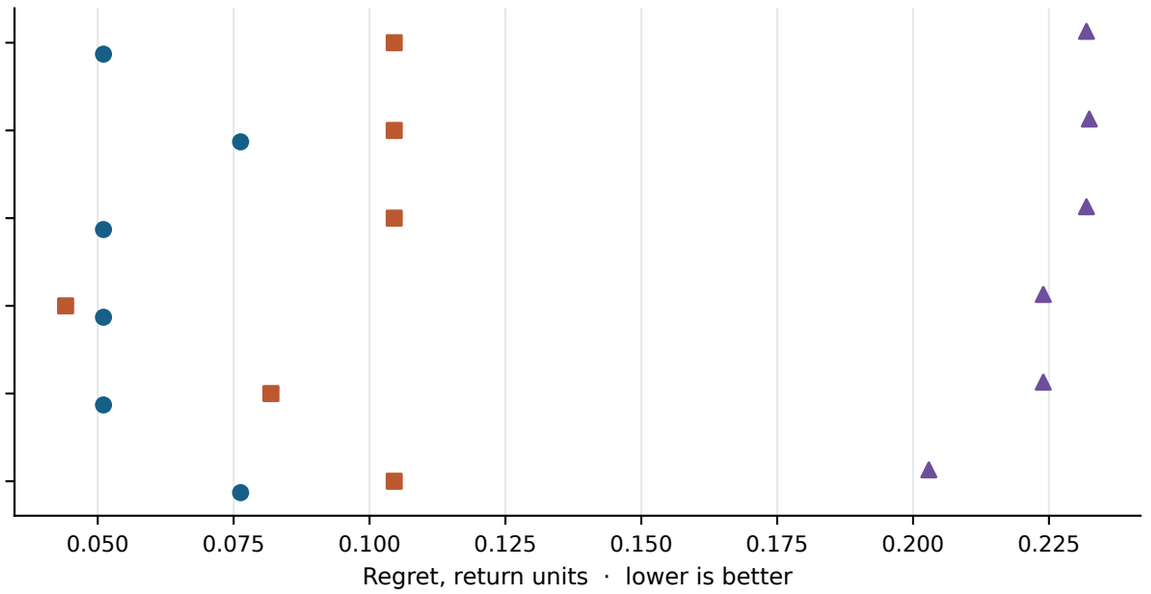


Ordinary · BCA — High-load six-action regret

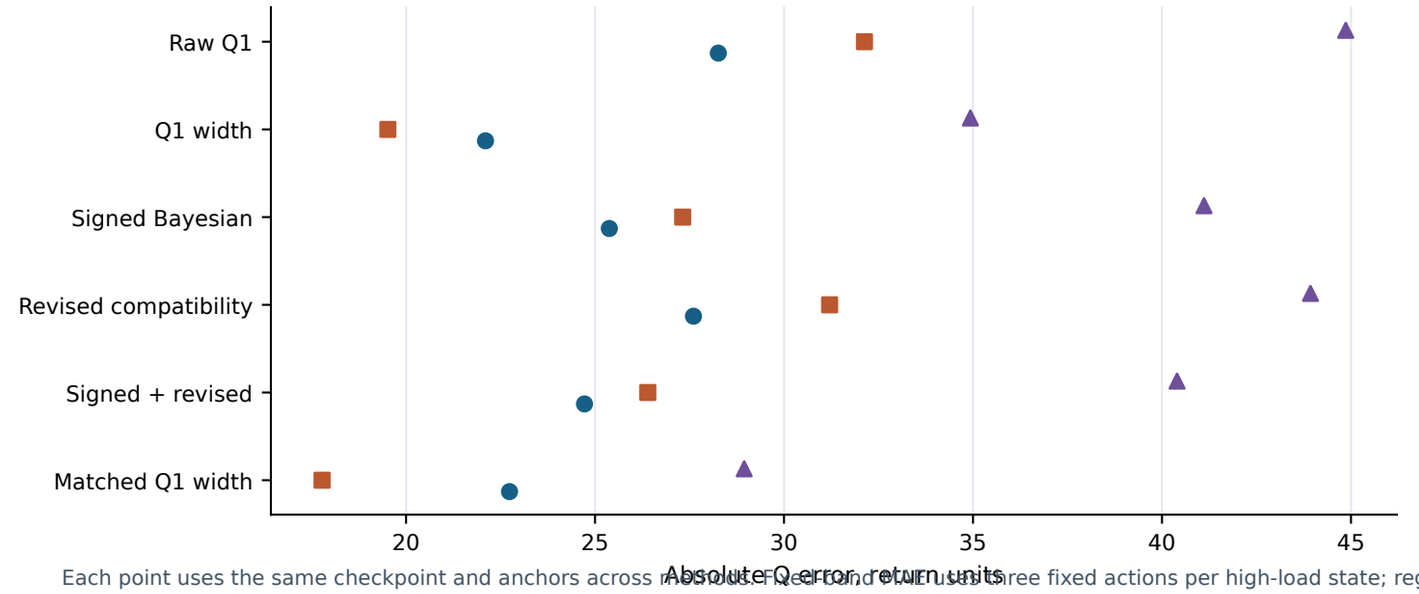
Strong Current · NATIVE — High-load, fixed-band MAE



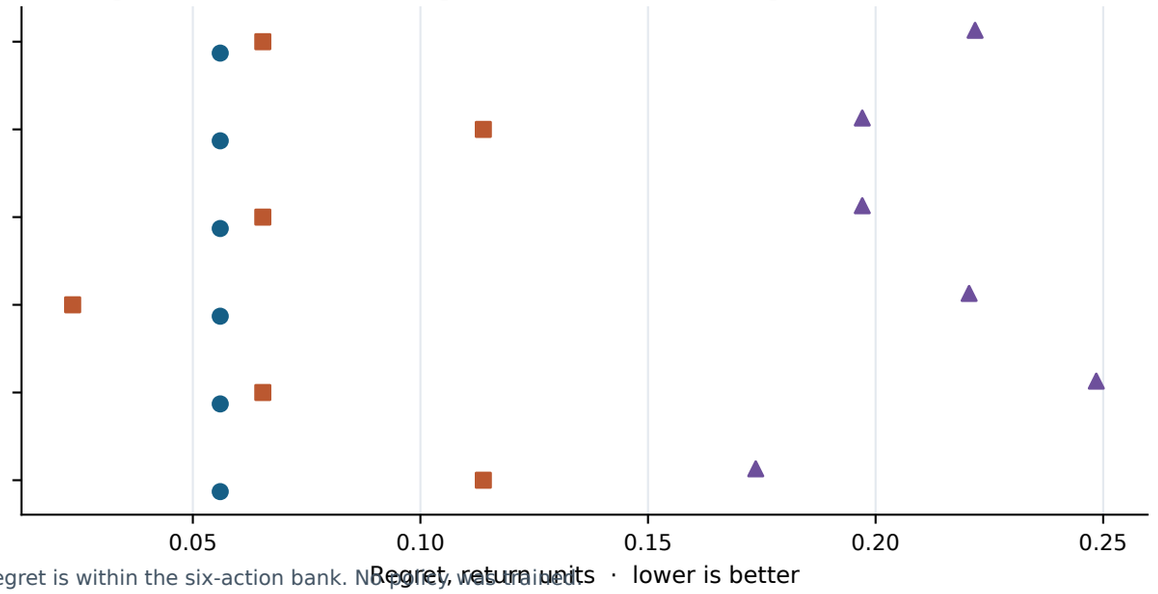
Strong Current · NATIVE — High-load six-action regret



Strong Current · BCA — High-load, fixed-band MAE



Strong Current · BCA — High-load six-action regret



Each point uses the same checkpoint and anchors across methods. Fixed-band MAE uses three fixed actions per high-load state; regret is within the six-action bank. No policy was trained.
